

Interview Participant 2 – XR Study Whiteboard

Evidence: [XR Study Whiteboard – Participant 2 Testing Recording](#)

Nayaka: Hello, thanks for testing my XR Study Whiteboard prototype. Please think aloud while you use it and tell me what you expect to happen. I am testing the prototype, not you, so there are no wrong answers. You can stop at any time. Is it okay if I audio record your feedback for my evaluation? The recording will only be used for this project, and you can ask me to stop at any time.

Interview Participant 2: Yeah, it's okay.

Nayaka: Before using anything, please look around the classroom and tell me what you think you can do here.

Interview Participant 2: I think there are chairs, so I assume we can sit.

Nayaka: Maybe you could look at the guide at the top. Can you see it clearly and understand it?

Interview Participant 2: Yeah.

Nayaka: What are you expecting you can do here?

Interview Participant 2: Maybe you can write something on the whiteboard.

Nayaka: Yes, that's correct. If you want to write on the whiteboard, what should you select first?

Interview Participant 2: Whiteboard.

Nayaka: Okay, nice. After you select the whiteboard, what can you see here?

Interview Participant 2: A marker.

Nayaka: What do you think the marker is supposed to do?

Interview Participant 2: I can write here?

Nayaka: Yes. Can you try changing the marker colour and then draw a vertical line, a horizontal line, and a circle?

Interview Participant 2: Okay.

Nayaka: Great, so you can operate the whiteboard. Can you try to erase something on the whiteboard?

Interview Participant 2: Okay.

Nayaka: It can be difficult to erase everything one by one, so can you try to clear the whole whiteboard?

Interview Participant 2: Done.

Nayaka: Nice. Now move to one of the tables using any available method. Tell me what you notice when you arrive at the table.

Interview Participant 2: I got a paper.

Nayaka: What do you think the paper is for?

Interview Participant 2: I think we can write something.

Nayaka: You can also see the whiteboard from here. What are you expecting to do here?

Interview Participant 2: We can write notes.

Nayaka: Yes. When you want to write on the paper, what do you need?

Interview Participant 2: I need a pen.

Nayaka: How can you get that pen? Do you notice anything here?

Interview Participant 2: Yes.

Nayaka: You can move forward a little if you want to see it more clearly.

Interview Participant 2: Oh, okay.

Nayaka: Can you try drawing something on the paper?

Interview Participant 2: Okay.

Nayaka: Can you try to erase it and then clear it like you did before?

Interview Participant 2: Yes, I can.

Nayaka: Nice. You seem to understand the main features. What was the easiest part and what was the most difficult part of using the prototype?

Interview Participant 2: I think the easiest part was writing something on the whiteboard.

Nayaka: What was the hardest part?

Interview Participant 2: Writing something on the notes.

Nayaka: On the paper on the table?

Interview Participant 2: Yeah.

Nayaka: Why was that more difficult?

Interview Participant 2: Because at first I didn't really see the tools.

Nayaka: So when you first saw the paper, you were looking for the tools before you started drawing, but you couldn't see them clearly?

Interview Participant 2: Yes.

Nayaka: You needed to move forward a little before you could see them?

Interview Participant 2: Yes.

Nayaka: Were the drawing tools and menus clear? If not, what made them difficult to find?

Interview Participant 2: Yeah, I think it's pretty clear, but I just didn't see it because I didn't move forward.

Nayaka: How did drawing on the paper compare with drawing on the whiteboard?

Interview Participant 2: I feel like it's easier to draw on the whiteboard.

Nayaka: Did you notice any glitches, gaps, unwanted marks, or anything unexpected while drawing, or was it smooth?

Interview Participant 2: It's smooth.

Nayaka: How did you know how to move to the table? What would make the teleport control easier to notice?

Interview Participant 2: It's shown pretty clearly on the screen, so I can see it.

Nayaka: Great. On a scale from one to five, how confident would you feel using this prototype again, and why?

Interview Participant 2: Five. I think it's really helpful for students.

Nayaka: It could help students stay focused on the class and feel like they are in a classroom environment?

Interview Participant 2: Yeah.

Nayaka: What is the most important improvement you would suggest?

Interview Participant 2: Maybe make it feel bigger and maybe add more tables.

Nayaka: Who do you think this prototype would be useful for and why?

Interview Participant 2: Students, because it helps students study and write notes in a class environment, so they can feel more focused.

Nayaka: Can you show me which part of the prototype you found useful?

Interview Participant 2: Writing on the whiteboard.

Nayaka: Okay, thank you for your feedback and for answering my questions.

Interview Participant 2: Thank you.
