

Interview Participant 3 – XR Study Whiteboard

Evidence: [XR Study Whiteboard – Participant 3 Testing Recording](#)

Nayaka: Hi, thank you for testing my XR Study Whiteboard prototype. Please think aloud while you use it and tell me what you expect to happen. I am testing the prototype, so there are no wrong answers. You can stop at any time. Is it okay if I audio record your feedback for my evaluation?

Interview Participant 3: Yes.

Nayaka: Okay. You can ask me to stop at any time. Before using anything, please look around the classroom and tell me what you think you can do here.

Interview Participant 3: Can I tell you what I see?

Nayaka: Yes.

Interview Participant 3: It looks like a normal classroom.

Nayaka: What can you see over here?

Interview Participant 3: Tools?

Nayaka: Yes. Can you try to press it?

Interview Participant 3: Alright. Whiteboard? Oh, it's moving. Is it a teleport button?

Nayaka: Yes. What I want you to do is move to the whiteboard. You're already at the whiteboard now. Look over here. What do you see and what do you think it could be? You can move forward if you need to.

Interview Participant 3: XR Study Whiteboard. Is it like a tool?

Nayaka: Yes, it's a tool panel. You can use the marker, eraser, and colours. Can you try to draw a horizontal line, a vertical line, and a circle? Maybe you could choose the colour first.

Interview Participant 3: Okay.

Nayaka: Select the marker and then choose a colour.

Interview Participant 3: Okay.

Nayaka: Now try to draw a vertical line, a horizontal line, and a circle.

Interview Participant 3: Okay.

Nayaka: Can you try to erase the drawing?

Interview Participant 3: Okay, eraser.

Nayaka: Nice. Can you try to clear the board so you can erase everything easily?

Interview Participant 3: Does it work?

Nayaka: Yes.

Interview Participant 3: Wow. Nice. That's so cool.

Nayaka: Thank you. Now try to move as a student to one of the tables.

Interview Participant 3: Okay.

Nayaka: Nice. What do you see on this table?

Interview Participant 3: I see tools.

Nayaka: Yes, and what else?

Interview Participant 3: A paper? Oh, okay, it's a paper.

Nayaka: Can you try to draw something on it?

Interview Participant 3: How can I control it?

Nayaka: You can select the tools. You can also move forward if you need to see them more clearly.

Interview Participant 3: Okay. I see Pencil, Clear Paper, and Eraser.

Nayaka: Yes. Try the pencil.

Interview Participant 3: Okay.

Nayaka: Nice. Can you try to erase your drawing and then clear the paper?

Interview Participant 3: Okay.

Nayaka: Nice. You did very well. What was the easiest part and what was the most difficult part of this demonstration?

Interview Participant 3: The easiest part is that I knew right away what to do with the tools.

Nayaka: Okay. What was the hardest part?

Interview Participant 3: Maybe because I cannot look up and down, so it's kind of hard.

Nayaka: That's good feedback. By looking at the paper and the whiteboard, what are you expecting the user to do? Imagine there is a teacher and you have notes to take.

Interview Participant 3: Write down, draw, and take notes.

Nayaka: Yes, writing notes. You can also see that there are a lot of tables here.

Interview Participant 3: So, is it multiplayer?

Nayaka: Yes, that is something the concept can support in the future. I designed this for students so they can stay focused on the class and feel like they are in an actual classroom. On a scale from one to five, how confident would you feel using this prototype again?

Interview Participant 3: Five out of five, I think.

Nayaka: What is the most important improvement you think I need to make?

Interview Participant 3: Like I said, being able to look up and down. Maybe also add more features to the whiteboard, like drawing.

Nayaka: Okay, thank you for your feedback. That's all. Thank you so much.

Interview Participant 3: Thank you.
